

Silvermine Stone pioneered the mortarless stone category, and is still the only brand that combines a suite of unique features making it the right selection for any post frame project.

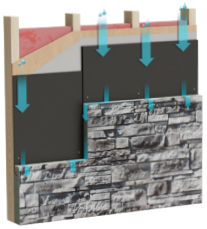

1 CONVENIENT & SIMPLE INSTALLATION

- **Flat rectangles** (no tabs or grooves to align)
- **Fast corners** (pre-cut & laid out)

Offers the look and feel of stone, but installs like siding.

2 PROTECTS FROM MOISTURE with PATENTED FLASHING SYSTEM

This patented system provides 8” of flashing per stone panel, protecting the home from moisture damage, mold, mildew, and the effects of freezing/thawing

3 REAL STONE AESTHETICS

- **Six Stone Color Options** with complimentary sills & accesories
- **Over 50 unique panel designs**, cast from CNC milled master panels to ensure quality and precision
- **High definition coloring** that is cast into the stone with tinted batch coloring

Add curb appeal to your project

SIMPLE + FAST + EASY

with Silvermine Stone's Pillar System

Add character to the front of the house | Dress up porch or deck posts
Driveway entrances | Mailboxes & more

Step 1 Choose The Right Size

Pre-Cut Pillar Stones are available for:

- 18" x 18" Pillars
- 24" x 24" Pillars

The pillar stones install around a Silvermine frame kit pictured below or you can easily construct your own frame.*

No masonry skills required

Step 2 Choose Your Stone Color

Aspen Peak | Dover Cliff | Monument Valley | Marin Fog | Dakota Sunset | Evening Gray

Step 3 Choose a Cap Style & Color

22" or 28" Flat Cap

OR

22" Split Cap

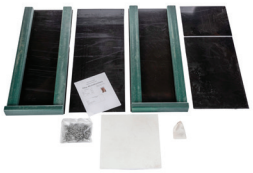

split cap leaves a 6" (actual) square opening for a post

Available in:
Sand, Slate & Frost

SPEED UP THE PROCESS WITH

18" PILLAR FRAME KIT

No Cutting or Measuring Required

Pillar Kit Includes:

- A pre-cut, ready to assemble polymer (no-rot) frame
- Frame assembly screws
- Fasteners for stone

Available to quickly and easily build an 18" x 18" pillar in:

- 36" Height
- 48" Height

The frame kits are designed to be stacked creating taller pillars.**

** Pillar frames and stones are non-structural and are designed for decorative applications

*Polymer frame kits are optional. A wooden frame can be built.
The size should be 14-1/4" square if using 18" pillar stones or 20-1/4" square if using 24" pillar stones.
